

Md Aamir Khan

Portfolio | mdaamirkhan7186@gmail.com | +91 8240968108 | Github | LinkedIn | Blog

Full-Stack Developer with 5+ years of experience in designing and delivering scalable, high-performance web applications. Proficient in **NodeJs**, **DotNet**, **ReactJs**, **JavaScript**, **TypeScript**, **AWS**, **MongoDB** and **Kafka**, with strong expertise in DevOps practices using **Docker**, **Kubernetes**, and **Terraform**. Proven ability to optimize backend performance and user experience.

EDUCATION

NARULA INSTITUTE OF TECHNOLOGY

BACHELOR OF TECHNOLOGY (HONS.) COMPUTER SCIENCE

Aug 2016 - June 2020 | Kolkata, India

EXPERIENCE

ZF GROUP | FULL-STACK DEVELOPER

Jan 2023 – Present | Bengaluru, India

Project Name:- SCALAR - It's an advanced Fleet Orchestration Platform (FOP) that digitizes and automates commercial fleet management for passengers and cargo.

Scalable Real-time Notification-center to streamline communications.

- Led the design and development of both high and low-level architecture, in **NodeJs** with **TypeScript**, **ReactJs**, **AWS**, **MongoDB**, **Terraform**.
- Designed flexible **MongoDB** models and built dynamic notification settings in **ReactJs** and **NodeJs** for easy module integration.
- Built a scalable email service with throughput and delivery accuracy in **DotNet**.
- Implemented fast and secure RESTful API using **AWS API Gateway**, achieving a **25%** reduction in response time in **NodeJs** with **TypeScript**.
- Reduced notification response time by **40%** by fine-tuning **MongoDB** queries.

Driver Management to efficiently manage driver roles, and handling vehicle linking and unlinking.

- Implemented driver profile management with end-to-end identity handling and seamless integration of driver profiles in **DotNet**, **ReactJs**, **AWS**, **MongoDB**.
- Created advanced search system to manage drivers, boosting efficiency by **30%** in **DotNet** and **ReactJs**.
- Enabled drivers to access and manage their roles via the mobile app.
- Streamlined and automated Driver UI workflows, boosting development speed by **30%** in **ReactJs**, **WebDriverIO** and **JEST**.

Developed a mobile application for drivers to easily connect with their assigned vehicles and track journey details.

- Designed and implemented a vehicle selection screen in **React Native** for seamless vehicle connection.
- Built a driver profile module to display driver details and real-time status.
- Integrated MirrorFly and push notifications to handle vehicle link/unlink events.
- Built secure **NodeJs** APIs for driver-vehicle association, enhancing journey experience.

ACCENTURE | FULL-STACK DEVELOPER

Aug 2020 – Jan 2023 | Bengaluru, India

Cloud Provisioning marketplace

- Built cloud provisioning marketplace with **AWS** and other providers in **Python**, **NodeJs** with **JavaScript** and **ReactJs**.
- Built secure and fast api in **NodeJS** to handle infrastructure provisioning.
- Created real-time tracking system for live orders, enhancing user experience by **40%** in **ReactJs** with **TypeScript**.
- Implemented **Nginx** based maintenance page, cutting downtime by **15%**.
- Deployed and managed microservices using **Docker** and **Kubernetes**, ensuring scalable and reliable application delivery.

PROJECTS

- Built e-commerce platform with OAUTH login, Razorpay integration, and dynamic stock system. ([Link](#))
- Developed web app to visualize GitHub user data using charts and language analysis. ([Link](#))

SKILLS

BACKEND

NodeJs • JavaScript • TypeScript • DotNet • Python • AWS

FRONT-END

ReactJs • React-Native • Redux • Html • CSS • Bootstrap • Material UI • Tailwind

DEVOPS

Nginx • Docker • Terraform • Kubernetes • Terragrunt • Helm

GENERATIVE AI

OpenAI • LangChain • LangGraph • LangSmith • ChatGpt • Copilot

DATABASE

MongoDB

SOFT SKILLS

Good Communication Skills • Teamwork • Adaptability • Continuous Learning

CERTIFICATIONS

- Data Scientist ([Link](#))
- Backend System Design ([Link](#))
- Frontend System Design([Link](#))
- Data Structures and Algorithms ([Link](#))
- Micro-Frontend on React ([Link](#))
- TypeScript ([Link](#))
- Advanced NodeJs ([Link](#))

TECH OWNERSHIP

- Deployment responsibility for all the environments both on docker and kubernetes architecture
- Database ownership in all the environments
- Code Reviewer for both Front-end and Back-end
