Current Location: India | Willing to Relocate

Nationality: Indian | Passport: Available

PROFESSIONAL SUMMARY

Full Stack Engineer with 6 years of experience engineering scalable, cloud-native platforms with a strong focus on backend performance and system design. Proven ability to build real-time, distributed systems, optimize APIs, and reduce latency by up to 40%, while driving reliability and efficiency across production environments.

TECHNICAL SKILLS

- Backend: Node.js, JavaScript, TypeScript, DotNET, Python, Kafka
- Artificial Intelligence: AgenticAI, LangChain, LangGraph, Generative AI, Multi-Agents
- Frontend: ReactJs, Redux, React Native, HTML, CSS, Tailwind, Bootstrap
- DevOps: AWS, Docker, Kubernetes, Terraform, Terragrunt, Nginx, Helm
- Database: MongoDB, MySQL
- Tools: Git, Sonarqube, Sauce Labs
- Soft Skills: Strong Communication, Analytical Thinking, Adaptability in Dynamic Environments

PROFESSIONAL EXPERIENCE IQVIA – Software Development Engineer 4 Bengaluru, India | Jan 2026 – Present

Built a collaborative platform for Raters and Clinical Specialists to conduct, review, and discuss clinical trials with integrated scheduling and real-time communication. Noteworthy contributions include:

- Developed a collaborative web platform for Raters and Clinical Specialists to review and discuss clinical trials.
- Designed role-based workflows for Admins, Raters, and Clinical Specialists with scheduling and availability management features.
- Integrated real-time video/audio communication and structured feedback/rating systems for remote collaboration.
- Improved coordination, session management, and overall efficiency in clinical trial evaluation processes.
- Tech Stack: ReactJs, NodeJs (Fastify), AWS, MySQL, Twillio

ZF Group – Full Stack Developer Bengaluru, India | Jan 2023 – Jan 2026

Developed a **scalable real-time notification center**, which played a pivotal role in streamlining communications. Noteworthy contributions include:

- Led the design and development of both high and low-level architecture from scratch.
- Built event notification email service with throughput and delivery accuracy.
- Reduced notification response time by **40%** by fine-tuning **MongoDB** queries, ensuring swift retrieval and display of notifications.
- Implemented fast and secure RESTful API using **AWS API Gateway**, achieving a **25%** reduction in response time.
- Automated both the frontend and backend, achieving a 30% increase in development speed and ensuring robust functionality through comprehensive unit testing.
- Tech Stack: ReactJs, NodeJs, TypeScript, MongoDB, AWS, Terraform, Terragrunt, Helm.

Developed a **Driver management** admin module to efficiently manage driver roles, and handling vehicle linking and unlinking which is a core of business. Noteworthy contributions include:

- Implemented driver profile management with end-to-end identity handling and seamless integration of driver profiles.
- Created advanced search system to manage drivers, boosting efficiency by **30%**.
- Enabled drivers to access and manage their roles via the mobile app.
- Streamlined and automated Driver UI workflows, boosting development speed by **30%**.
- Tech Stack: DotNet, ReactJs, MongoDB, AWS, Terraform, Terragrunt, Helm.

Developed a mobile application for drivers to easily connect with their assigned vehicles and track journey details. Key contributions:

- Designed and implemented a **vehicle selection screen** in **React Native** for seamless vehicle connection.
- Built a **driver profile module** to display driver details and real-time status.
- Integrated **Mirrorfly services** and push notifications to manage vehicle **linking and unlinking** events.
- Developed secure **APIs** to handle driver-vehicle associations, streamlining the end-to-end journey experience.
- Tech Stack: NodeJs, ReactJs, Redux, React Native, Mirrorfly, Android Studio.

Accenture – Full Stack Developer Bengaluru, India | Aug 2020 – Jan 2023

Worked as a full-stack developer to develop a one-stop marketplace used mainly for infrastructure provisioning on different clouds. Noteworthy features include:

- Built cloud provisioning marketplace with AWS and other providers.
- Built secure and fast api to handle infrastructure provisioning.
- Implemented **Nginx** based maintenance page, cutting downtime by 15%.
- Developed infrastructure-specific UI enhancements, improving responsiveness by 25%.
- Created real-time tracking system for live orders, enhancing user experience by 40%.
- Deployed and managed microservices using Docker and Kubernetes, ensuring scalable and reliable application delivery.
- Tech Stack: NodeJs, Python, ReactJs, JavaScript, TypeScript, Terraform, AWS, MongoDB, Nginx.

KEY PROJECTS

AI-Powered PR Review Agent (Node.js + OpenAI) ([LINK](#))

- Developed and deployed a **Nodejs**-based GitHub bot using **OpenAI GPT-4** to automate PR reviews, commenting code suggestions, and enforcing coding standards, containerized for Docker and compliant with GitHub App workflows.

AI RESUME ANALYZER (NODE.JS / REACT + OPENAI) ([LINK](#))

- Built a full stack resume analysis tool using **NodeJs** and **ReactJs** with file upload and **OpenAI GPT** processing to extract skills, match job descriptions, and suggest improvements in real time.

Furniture E-Commerce ([LINK](#))

- Built e-commerce platform with **OAUTH** login, Razorpay integration, and dynamic stock system.

GitHub Profile Visualizer ([LINK](#))

- Developed web app to visualize GitHub user data using charts and language analysis

EDUCATION

Narula Institute of Technology B.Tech (Hons.) in Computer Science | Aug 2016 – Jun 2020 | Kolkata, India

CERTIFICATIONS

- [Data Scientist – Edureka](#)
- [Data Structures and Algorithms](#)
- [Micro-Frontend with React](#)
- [Advanced Typescript](#)
- [Advanced NodeJs](#)
- [Backend System Design](#)
- [Frontend System Design](#)

KEY ACHIEVEMENTS

- Ranked under top 300 in Hackwithinfy coding contest among 200000+ participants.
- Improved system performance by **40%** via query optimization
- Reduced API latency by **25%** using AWS API Gateway
- Increased development efficiency by **30%** through automation
